

1 Warm-up: Champion Round

Champion Warm-up ★★

$9 + 8 = \underline{\hspace{2cm}}$

$14 - 7 = \underline{\hspace{2cm}}$

$6 + 7 = \underline{\hspace{2cm}}$

$11 - 4 = \underline{\hspace{2cm}}$

2 Create Your Own: Be the Teacher

Create Your Own — Be the Teacher! ★★

Write 3 math problems for a grown-up to solve. Make one EASY, one MEDIUM, and one TRICKY. Then check their work — you are the teacher now!

EASY: _____

Their answer: _____ Correct? ☒ yes / no

MEDIUM: _____

Their answer: _____ Correct? ☒ yes / no

TRICKY: _____

Their answer: _____ Correct? ☒ yes / no

3 Estimate First: Silly Estimates

Estimate First! No calculating allowed — just smart estimates!

About how many crackers could you eat in one day?

My estimate: _____

About how many steps from your bed to the kitchen?

My estimate: _____

About how many books fit on one shelf?

My estimate: _____

About how many minutes is recess... er, playtime?

My estimate: _____

Pick ONE and actually check it. Was your estimate close? _____

4 Show Two Different Ways

Show two different ways to solve $35 + 47$ — you have so many strategies now!

Way 1: _____

Way 2: _____

Answer: _____ Which way was faster for you? _____

5 Story Problem Starring YOU

A story problem starring YOU! Read carefully and underline the important numbers.

You are the hero of a game. You score 36 points in round one and 28 points in round two. You need 75 points to win the golden trophy. How many more points do you need?

Draw or write your thinking: _____

_____ more points 🏆
