

Review: Leaves and Flowers

Week 13 — Friday | Complete Plant Review

Reading Time

This week we learned about leaves and flowers. Now let us review everything about plant parts together!

A plant has four main parts: roots, stems, leaves, and flowers. Roots hold the plant in the ground and soak up water. Stems carry water from the roots to the leaves and hold the plant up. Leaves catch sunlight to make food for the whole plant. Flowers make seeds that can grow into brand new plants.

All four parts work together. Without roots, the plant has no water. Without stems, the water cannot travel. Without leaves, the plant has no food. Without flowers, the plant cannot make new babies. A plant needs all four parts to stay healthy and grow.

Reading Questions

1. Name all four main parts of a plant.

2. Why do plants need all four parts?

3. What would happen if a plant had no leaves?

4. How do roots and stems work together? Explain.

Vocabulary Grid

Write a definition or draw a picture for each word.

Root

Stem

Leaf

Flower

Vein

Photosynthesis

Match Each Plant Part to Its Job

Plant Part	What it Does
Roots	Match: _____
Stem	Match: _____
Leaves	Match: _____
Flowers	Match: _____

Jobs to match: Makes food using sunlight, Holds the plant in the ground, Makes seeds for new plants, Carries water and holds the plant up

True or False — Circle Your Answer

- ☐ 1. Leaves are the food makers of the plant.
- ☐ 2. Roots can grow above the ground.
- ☐ 3. All leaves are the same shape.
- ☐ 4. Flowers attract bees with bright colors.
- ☐ 5. The stem carries water from roots to leaves.
- ☐ 6. A plant can grow without roots.

What Part Am I? Riddles

Riddle 1: I am under the ground. I soak up water. I hold the plant tight. What am I?

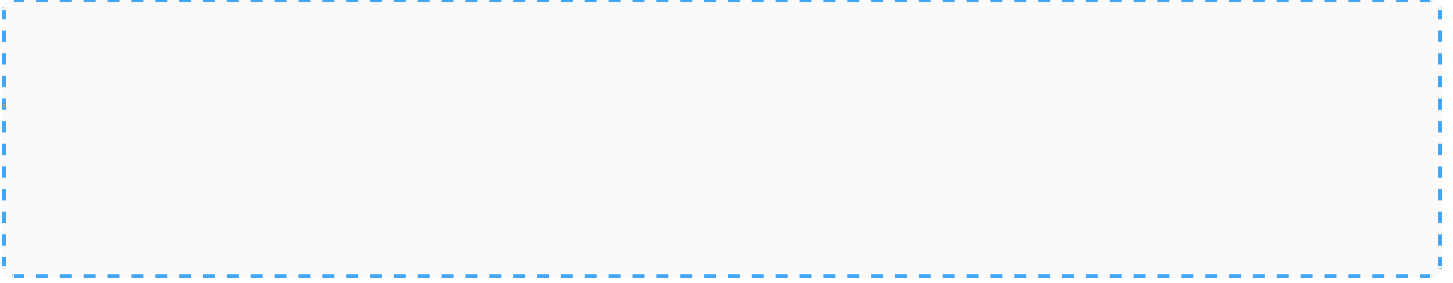

Riddle 2: I am flat and green. I catch the sun to make food. What am I?

Riddle 3: I am colorful and sweet-smelling. I make seeds. What am I?

Riddle 4: I am the backbone of the plant. I carry water up. What am I?

Draw and Label a Complete Plant

Draw a full plant below. Label all four parts: roots, stem, leaves, and flower.

Write About Plant Parts

If you were a plant, which part would you want to be? Why?

Write one thing you learned this week about plants.

Science Journal

This week I learned about leaves and flowers.

My favorite thing I learned was...

Something I want to learn more about is...
